

# *Syride*

Presented by  
Romain Lazerand

***Syride created a lightweight (110gr) and profiled (12.5 x 10.5 x 2 cm) device; it is the culmination of five years of research dedicated to the growing needs of sports practitioners wishing to conduct detailed monitoring of their practice to progress better and faster.***

 **syride**

## The module contains:

a 9-axis Accelerometer,  
Gyroscope, compass  
combination

The base is a flexible portion, very  
light (30gr) that sticks on the nose  
of the surfboard.

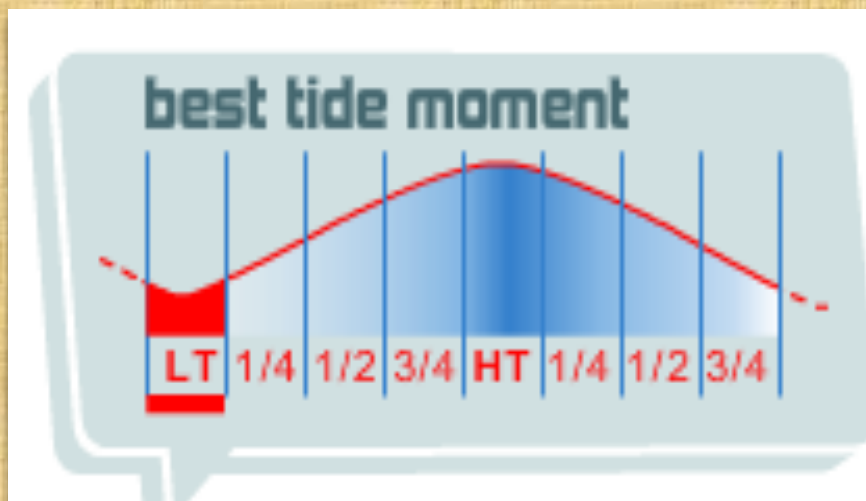

# Surfing

## In the water:

- GPS - Geographic location and guidance system while paddling

- Current tide data
- Most optimum tide time

## Other data in the water:

- GPS guidance
- Current tide data
- Live time and time length of the session
- Speed of the previous wave
- Temperature

Syride has a proprietary software which analyses the other aspects of a surf session in data form – meaning no more lying on how good it was yesterday...

## Out of the water:

- My session in concrete numbers
- Distance paddled/surfed
- Time paddling, idle, or riding
- Wave height
- Top speed
- Length of ride
- Calories
- Others...

# Comparing your performances with others...

The screenshot displays the syride website interface. At the top, there is a navigation bar with links for 'home', 'SESSIONS', 'PRODUCTS', 'INFO', 'REGISTER', and 'CONTACT'. A user profile section shows 'hello', 'account', and 'disconnect' options. A search bar is prominently featured. Below the navigation, a banner for 'the best : USA : CALIFORNIA' is visible. The main content area is divided into three columns: 'The biggest wave', 'The Fastest', and 'The Longest', each listing top 10 performances with dates, names, and ratings. A video player on the right shows a 'promotion' video. At the bottom, a map of California is overlaid with a 'SPOTS WORLD' overlay, and a 'CONCEPT VIDEO' section is visible on the right side.

## Future...

- Kite surfing
- Windsurfing
- Stand-up Paddle

Consumers want to re-live their experience and share it with the rest of the world. **But how?** MEMS in sports is where it starts

 **syride**
